Modular Architectural Wall System

by Smith & Fong Plyboo®

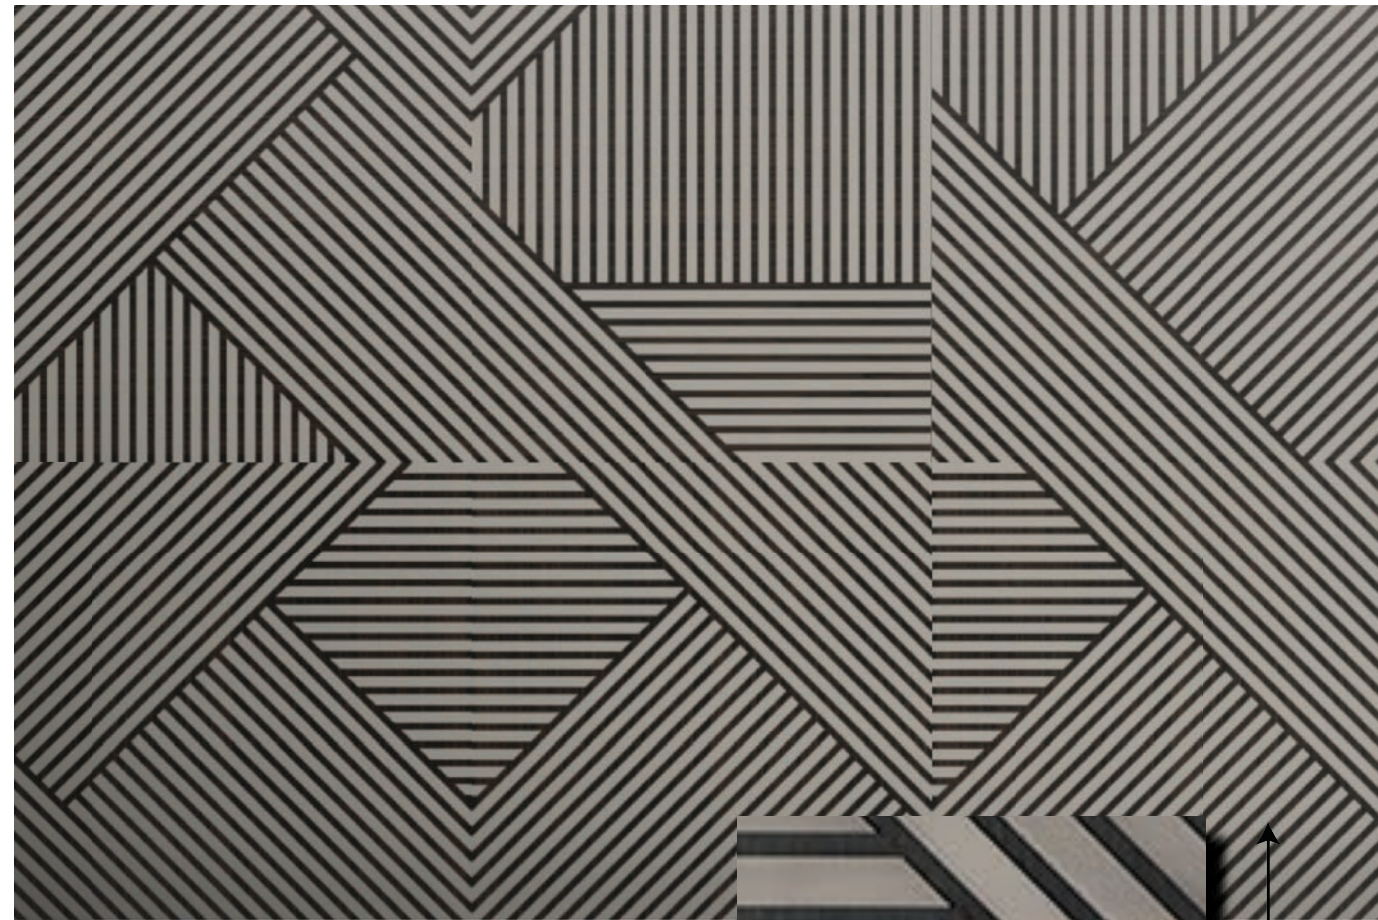

- 6 unique patterns (1, 2, 3 are foundation designs) 4, 5, 6 mirror the foundation patterns to create dynamic images
- Develop unique compositions working with repeating, randomized or rotating panels
- Ideal for wall, ceiling, and millwork applications offering ease of use in many concepts
- 8 beautiful colors available: use one color or multiple colors in your layout
- Standard panel is class C, class A or B available by request
- Easy installation with z-clip or similar system, can be used in 4' x 4' lay in ceiling grids or screw to ceiling structure
- FSC available, EPD and Life-Cycle Analysis
- All panels are ¾" x 47¾" x 47¾" 100% Realcore® Plyboo® bamboo
- All panels have face lines that are 1¼" wide, grooves that are ⅝" wide, cut-outs in FuturaSound are ⅝" wide and various lengths depending on the design pattern
- Solid border lines on FuturaSound are 2" from the edge of the panel at the perimeter and where there are solid lines in the design
