

LOUVER™

SMITH AND FONG PLYBOO — A COLLABORATION WITH ROBIN REIGI

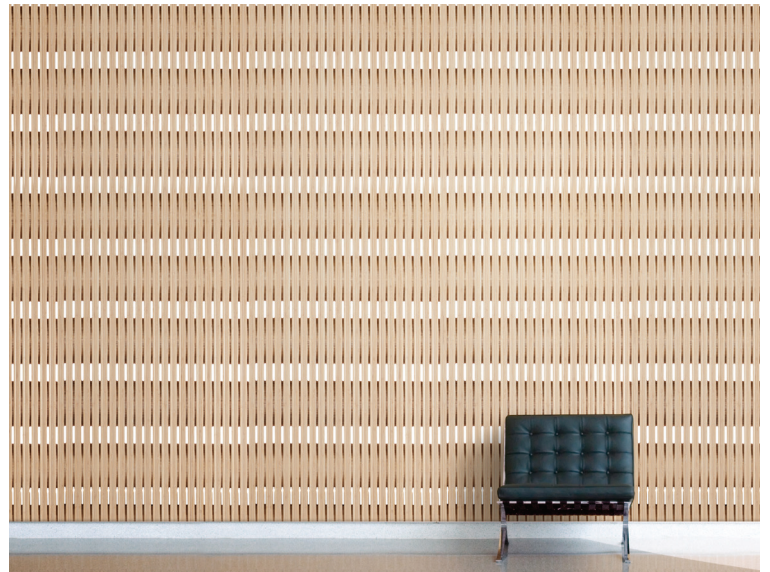

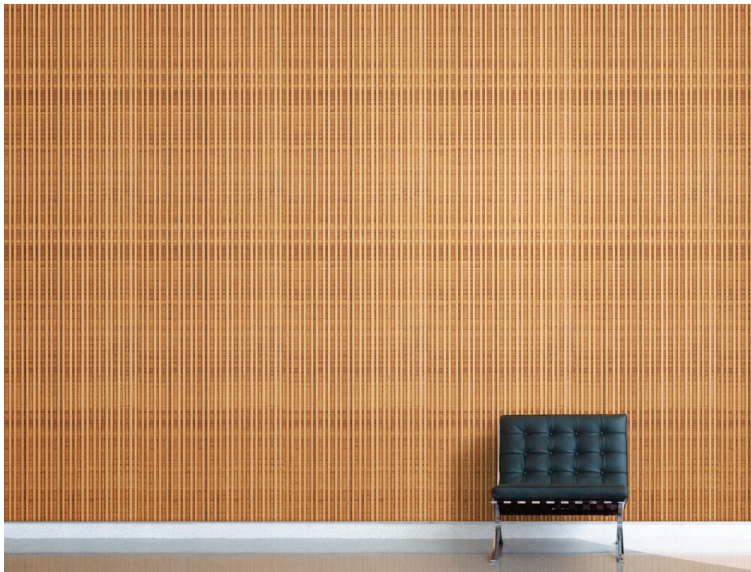

LOUVER™ COLLECTION

INTERIOR DESIGN

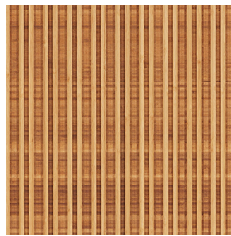

Louver™ is a series of carved 3-dimensional panels developed in collaboration with Robin Reigi. Inspired by the classically modernistic and beloved architectural element, Louver™ uses angular positions and perforation patterns to define space, direct light and absorb sound. The Louver styles of Sail, Butterfly and Beeswing are available in a range of scales from small to large. Louver™ is customizable in design and color options.
